Professional Summary

Front-End Developer with hands-on experience in crafting responsive, user-centric web applications using React, JavaScript, and TypeScript. Proficient in delivering scalable, high-performance solutions through clean code and innovative UI designs. Adept at integrating RESTful APIs and collaborating with teams to build seamless user experiences. Actively seeking to expand expertise in cutting-edge front-end technologies and UX best practices.

Technical Skills

Front-End Technologies:

- HTML5, CSS3 (Flexbox, Grid, Media Queries)

- JavaScript (ES6+), TypeScript

- React.js (Hooks, Context API), Next.js

- Tailwind CSS, Sass/SCSS

Tools and Platforms:

- Git & GitHub

- Postman (API Testing)

- Visual Studio Code

- RESTful APIs Integration

Other Skills:

- Responsive Design & Cross-Browser Compatibility

- Code Optimization (Lazy Loading, Code Splitting)

- Basic Back-End Integration (Node.js, Express.js)

Work Experience

Freelance Front-End Developer (2022 - Present):

- Designed and implemented interactive user interfaces using React and Tailwind CSS, improving client satisfaction rates by 25%.

- Optimized web performance using lazy loading and code-splitting techniques, achieving a 30% faster page load time.

- Developed custom admin dashboards to manage user data and content effectively.

- Collaborated with clients to create scalable solutions for API integrations and backend communication.

- Ensured cross-platform compatibility and responsive design for all projects.

Notable Projects

Car Sales and Purchase Platform:

- Technologies: React, CSS, Node.js, MySQL

- Description: A comprehensive platform for buying and selling cars with advanced features such as filtering and real-time chat.

- Key Contributions:

  - Designed an engaging, responsive UI for car browsing and comparison.

  - Built a backend to manage car listings and user profiles using REST APIs.

  - Created complex SQL queries for car reservations and request handling.

  - Implemented a real-time chat system using WebSocket, enhancing user-admin communication.

Job Recruitment Website:

- Technologies: React, CSS, Node.js, MySQL, Express

- Description: A platform that connects companies with job seekers, featuring a recommendation system.

- Key Contributions:

  - Developed a secure admin panel for managing job posts and applications.

  - Integrated AI-powered APIs for personalized job recommendations.

  - Designed a visually appealing interface that earned an A+ grade as a graduation project.
