HOSSAM SAYED SABER - Front-End Developer

Assiut, Egypt | +20 1033239589 | hosamsayedee@gmail.com

LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Front-End Developer with hands-on experience in building dynamic, high-performance web applications using React.js and TypeScript. I am skilled in designing interactive user interfaces and optimizing web performance through Lazy Loading and Code Splitting. Adept at integrating RESTful APIs and enhancing user experience (UX). Passionate about continuous learning and exploring cutting-edge technologies to improve application efficiency.

TECHNICAL SKILLS

Front-End Development: HTML5, CSS (Flexbox, Grid, Media Queries), JavaScript (ES6+), TypeScript

Frameworks & Libraries: React.js (Hooks, Context API, Redux, Zustand), Next.jsGit & GitHub

UI & Styling: Tailwind CSS, Material UI

Performance Optimization: CSR, SSR, ISR, SSG, SEO Optimization

Data Handling: RESTful APIs, GraphQL

Development Tools: Git & GitHub, CI/CD Pipelines, Postman (API Testing)

Testing & Quality: Jest, React Testing Library, Cypress

Additional Skills: Responsive Design, Lazy Loading, Code Splitting, Basic Back end (Node.js, Express.js)

WORK EXPERIENCE

Freelance Front-End Developer (2022 - 2024):

- Designed and implemented interactive user interfaces using React and Tailwind CSS, improving client satisfaction rates by 25%.

- Optimized web performance using lazy loading and code-splitting techniques, achieving a 30% faster page load time.

- Developed custom admin dashboards to manage user data and content effectively.

- Collaborated with clients to create scalable solutions for API integrations and backend communication.

- Ensured cross-platform compatibility and responsive design for all projects.

FEATURED PROJECTS

Ramadan Worship Website

Technologies: React, Tailwind CSS, JavaScript, Context API

[Live Demo](#) | [GitHub](#)

Description: An innovative platform that allows users to track daily worship activities during Ramadan, such as prayers, Quran reading, supplications, and charity

Habit Tracker Website

Technologies: React, CSS, JavaScript, Context API, Zustand

[Live Demo](#) | [GitHub](#)

Description: A modern web application that helps users track their daily habits, analyze progress, and stay motivated with an intuitive and visually appealing interface.

Car Sales and Purchase Website (4Matic Motors)

Technologies: React, CSS, Node.js, MySQL

[GitHub](#)

Description: A specialized platform for buying and selling new and used cars, allowing users to browse, view detailed vehicle information, and connect with sellers.

Job Recruitment Website (Graduation Project):

Technologies: React, CSS, Node.js, MySQL, Express

[GitHub](#)

Description: A platform connecting companies with job seekers, featuring an AI-powered recommendation system to match candidates with suitable job opportunities.

HOSSAM SAYED SABER - Front-End Developer

EDUCATION

- Bachelor's in Information Technology | Egyptian E-Learning University (EELU)
- **Graduation Year:** 2024

LANGUAGES

- Arabic: Native
- English: Advanced

INTERESTS

- Building cutting-edge web applications with React and Next.js.
- Enhancing user experiences (UX) through creative design approaches.
- Exploring new technologies and expanding full-stack development expertise
